Section	Page
1 Introduction to the NFHCP.....	1-1
Laying the Foundation	1-1
What is the Native Fish Habitat Conservation Plan?	1-3
Biology and Business: Setting Goals	1-5
Building on the Needs of Fish: The “Four C’s”	1-5
Forestry: A Long-Term Business	1-8
Focusing Conservation	1-9
The Basis of NFHCP Conservation Commitments.....	1-11
Historical Forest Practices.....	1-11
Conservation by Regulation	1-11
Environmental Forestry.....	1-12
Constructing NFHCP Commitments.....	1-15
A Broad-Based Approach to Conservation	1-15
Role of Technical Reports in Development of the NFHCP	1-17
Plum Creek’s Evaluation of Effects	1-18
NFHCP Commitments at a Glance	1-21
2 Road and Upland Management Commitments.....	2-1
Sediment Delivery Reduction Strategies.....	2-1
Slope Stability Considerations	2-3
Summary of Road and Upland Commitments	2-5
A. BMPs Governing Active Forest Practices.....	2-6
B. Management and Upgrade of Transportation System	2-10
C. Other Measures	2-21
3 Riparian Management Commitments.....	3-1
Riparian Conservation is More Than the Buffers	3-2
Forest Health and Tree Density Considerations.....	3-3
Stream Temperature	3-4
Plum Creek Technical Reports and the Development of Commitments	3-5
A. State Riparian Regulations as Basis	3-7
B. Channel Migration Zones	3-10
C. Other Streams that Support Fish.....	3-17
D. Headwater Streams.....	3-20
E. Riparian-Upland Interface	3-22
4 Range Management Commitments	4-1
Plum Creek Grazing Best Management Practices.....	4-2
Environmental Trend Indicators.....	4-4
Leaseholder Requirements	4-5
Hierarchical Approach to Monitoring Range Conditions and Trends	4-6

Contents (continued)

Section	Page
5 Land Use Planning Commitments.....	5-1
Land Use Planning: A Part of Plum Creek Business	5-1
Conservation-Oriented Land Use Planning.....	5-2
Who are the Landowners?	5-2
Principle-Based Land Use Planning.....	5-3
Land Use Planning Commitments and the Proportionality Approach.....	5-4
6 Legacy and Restoration Commitments	6-1
A. Key Migratory Rivers.....	6-1
B. Fish Habitat Restoration Opportunities	6-6
C. Other Opportunities for Removing Threats.....	6-8
7 Administration and Implementation Commitments.....	7-1
8 Adaptive Management and Monitoring Commitments.....	8-1
Monitor.....	8-2
Implementation Monitoring	8-3
Effectiveness Monitoring	8-3
Evaluate: The Tools for Applying Adaptive Management	8-5
The NFHCP Implementation Framework	8-6
The Adaptive Management Pathway	8-8
Respond.....	8-12
Important Economic Considerations	8-12
The Three Kinds of Management Response	8-13
Adaptive Management Commitments.....	8-14
<i>The NFHCP was originally produced as a combined document with the Environmental Impact Statement (EIS). The following three sections have been added to help the reader of the stand-alone NFHCP to better understand the document. No other changes were made from the September 2000 Final EIS/NFHCP combined document.</i>	
9 References.....	9-1
10 Glossary.....	10-1
11 Abbreviations and Acronyms.....	11-1

Contents (continued)

Appendices

- R-1 Enhanced BMPs for New Roads
- R-2 Road Condition Inspections (RCI) Checklist
- R-3 Enhanced BMPs for Road Upgrades
- R-4 Hot Spot Action Planning Form
- R-5 Hot Spot Prioritization
- R-6 Fish Passage Insert of NFHCP Implementation Manual
- R-7 Road Abandonment Criteria
- R-8 Unstable Features Checklist
- Rp-1 Montana and Idaho Riparian Harvest Rules
- Rp-2 Eastern and Western Washington NFHCP Riparian Prescriptions
- Rp-3 Comparison of State Rules and NFHCP Prescriptions
- Rp-4 Riparian Definitions and Procedures
- Rp-5 CMZ Prescription Key
- Rp-6 NFHCP Covered Activities that Are “Exempt” from Washington’s Forest Practices Rules
- G-1 Grazing Best Management Practices
- Lg-1 Riparian Condition Survey
- A-1 NFHCP External Audit Protocol
- AM-1 NFHCP Effectiveness Monitoring

Tables	Page
NFHCP1-1 Elements of the NFHCP and Their Location within the Combined EIS/NFHCP Document	1-4
NFHCP1-2 Biological Goals and Objectives of Plum Creek’s NFHCP	1-7
NFHCP1-3 Plum Creek’s NFHCP Business Goals.....	1-8
NFHCP1-4 Plum Creek Technical Reports Used in Crafting the NFHCP	1-17
NFHCP2-1 Montana Best Management Practices (BMPs) that Address Slope Stability	2-4
NFHCP3-1 Descriptions of Channel Migration Zone Types and Their Sensitivity to Timber Harvest.....	3-11
NFHCP4-1 Environmental Trend Indicators in Plum Creek’s Grazing BMPs.....	4-5
NFHCP7-1 Description and Frequency of NFHCP Reporting Performance Metrics.....	7-5
NFHCP8-1a Explanation of Plum Creek NFHCP Implementation Framework Table	8-19
NFHCP8-1b Plum Creek NFHCP Implementation Framework	8-19
NFHCP8-2 Plum Creek Adaptive Management Trigger Detail Table	8-25
NFHCP8-3 Site-Specific Management Planning Framework and Components for the NFHCP	8-27

Contents (continued)

Figures		Page
NFHCP2-1	Montana BMP Audits: 1990-1998	2-7
NFHCP3-1	Mean Canopy Cover Before and After Harvest for 9 Sites in Montana and 1 Site in Idaho (Site 4). Sites 3, 5, 6, and 7 Had a Statistically Significant Decrease in Canopy Cover	3-5
NFHCP3-2	Example of How NFHCP Commitments Supplement State Rules and Add Protection to Streams.....	3-8
NFHCP3-3	Channel Cross-Section Terms.....	3-10
NFHCP8-1	The NFHCP Implementation Framework	8-9
